

Bharat Systems Helped Customers Avail Online Streaming on TV

Requirement

The main requirements of the client were :

- An external recording and re-transmission of program that is accessible and convenient.
- To make all the major online streaming platforms like Amazon Prime, Netflix, Disney+ Hotstar, etc. available.

Client Challenge

- The client had to miss watching favorite TV programs because of busy work schedule. They wanted programs to be recorded at convenience.
- The client had access to Netflix, Amazon Prime, and Hotstar. They wanted to stream it directly on TV, without any external devices for a happy and hassle free family time.
- The client also wanted a set of free movies to be available to watch on TV without external devices

Approach

Based on the client requirement, Bharat Systems suggested the following approaches :

- In case of external recording being the only requirement - HD Set-up box with 1-3 MP resolution was suggested.
- In case of external recording, online streaming & 10,000 free movies - Airtel 4k DTH Xtreme with 4 MP and 1-3 MP resolution was suggested.

Results

The customer decided to go with Airtel Xtreme 4k DTH plan, and the following was achieved :

- The customer no longer had to fuss about not being able to record favourite TV programs.
- The customer was able to stream Netflix, Amazon Prime, and other platforms on TV without any problems.
- The customer could also store 10,000 movies for free, internally. No external source was required.
