

**Bharat
Systems
Conceived and
Developed STBs
Testing Set-Up
for Bosch**

Requirement

The main requirement of the client was to be able to test set-top boxes, taking into account all parameters like geographical location, temperature, & recordings of the testing etc.

Client Challenge

- **STB has to be tested for :**
 - **Different geographical locations.**
 - **Different temperatures varying between -20 C to +65 C.**
- **Client wanted to monitor audio & video of specific STBs, through tests from a remote location.**
- **Client also needed all-time access to the last 30-day recording of the entire set up.**
- **Test set up should run 24/7, excluding the loading & unloading time.**

Results

The STBs were tested at extreme temperatures, and the results were positive.

The client was able to successfully monitor videos & recordings of particular STBs, at any point of time.

The client was able to monitor all STB related testing, successfully.
